FOR IMMEDIATE RELEASE

**CEELITE ANNOUNCES \$4 MILLION PRIVATE EQUITY INVESTMENT
Private Equity firm The Musser Group is lead investor**

Raised capital to benefit construction of new manufacturing plant in the United States

Blue Bell, PA (Dec. 20, 2007) – CeeLite™, the world’s first commercial manufacturer of Light Emitting Capacitor (LEC) technology, today announced that it has raised \$4 million in private equity investment.

“This is a monumental event for the entire CeeLite family,” Malcolm Hayward, CeeLite Chief Executive Officer, said. “Thanks to the dedicated guidance of Pete Musser and The Musser Group, we have been able to achieve our most recent achievement. The money that has been raised in this private equity round of financing will be used to further solidify CeeLite’s position as an innovative leader in the lighting industry.”

CeeLite’s implementation plan for the investment includes an expansion of the company’s infrastructure to meet current growth expectations, highlighted by the planned opening of a new plant in the Philadelphia Metropolitan Area sometime in 2008. The addition of a manufacturing facility in the United States will allow CeeLite’s existing Taiwanese facility to focus on the continuously-expanding Asian markets.

“In today’s global economy, it is not often that an American company has the opportunity to bring new manufacturing jobs to the United States,” Hayward said.

“CeeLite chose the Delaware Valley as its headquarters because of the area’s long-standing traditions in technology, manufacturing, and entrepreneurialism and we look forward to further anchoring our presence in this fantastic region.”

Founded in 2001, The Musser Group was designed to help entrepreneurs and small, emerging companies take their businesses to the next level by providing financial capital, as well as the knowledge and relationship capital built by Pete Musser during a 53-year career which has spanned 500 companies and nearly \$10 billion in capital raised.

“CeeLite’s product, technology, team, and market represent a burgeoning opportunity to The Musser Group and any investor looking for emerging growth,” Pete Musser, The Musser Group founder and CEO, said. “We have been very impressed by the company and their product’s impact on the Green Energy and Technology Market. CeeLite is truly ushering in a lighting revolution, we believe, on how marketers market, advertisers sell, and cities light their streets.”

ABOUT CEELITE

Headquartered in Blue Bell, PA, CeeLite is the world’s first commercial manufacturer of Light Emitting Capacitor (LEC) technology that is destined to redefine the way light is being used across industries. CeeLite’s advanced LEC technology turns any surface into a light source and creates new markets where lighting was previously impossible in addition to replacing traditional lighting applications. The company’s LEC products provide flawless surface illumination as the result of major research and development engineering advancements.

- MORE -

CeeLite's LEC technology has been named one of TIME's Best Inventions of 2006, Electronic Products Magazine's 2006 Product of the Year and Buildings Magazine's Top 100 Products 2007 in addition to various Products of the Month awards. CeeLite's first product to market was the flat, flexible lightbulb, which ranges in size up to 30 square feet. Typical applications include bus advertising, window signage and street intersection signage. For additional information, product samples, or to locate an Authorized Distributor, please visit the CeeLite Web site at www.CeeLite.com.
