Neschen Americas has entered an agreement with CeeLite LLC to be a certified supplier of textile printing media for use with CeeLite™ Light Emitting Capacitor (LEC) technology. Neschen Americas has acquired CeeLite certification for select materials from its Neschen® SolvoTex™ line of textile media, according to a press release. "When graphics printed on these textiles are placed on a CeeLite LEC panel, they exhibit bold, rich tones, even color saturation and optimum brightness. These textiles are also highly durable to match the broad range of indoor and outdoor applications that CeeLite LEC panels can address," says **Angela Mohni**, vice president of marketing at Neschen Americas.

Bird-B-Gone, Mission Viejo, Calif., a manufacturer of bird control products for signs, has been awarded the readers' choice award from *Building Operating Management* magazine. The award is given to businesses that have appeared in the pages of *BOM* and received the highest number of requests for information from readers, according to a press release. The magazine serves commercial and industrial building owners and facility executives, and the award is "a testament to the need of such products in the facility management industry," said **Bruce Donoho**, Bird-B-Gone owner.

New media solutions company **LevelVision**, Roanoke, Va., which offers portable dynamic displays, has appointed **James O'Neil Leftwich** vice president, finance and controller. Leftwich has more than 20 years of experience in finance and accounting.

LED traffic signal company **Leotek Electronics Corp.**, Santa Clara, Calif., has announced a long-term partnership with **Liteon Group Taiwan**. The undertaking provides Leotek with a new and vigorous focus toward development of the highest-quality LED commercial sign components, according to a press release. The company will be exhibiting at the ISA International Sign Expo in booth #909.

LEOTEK

Digital display manufacturer **D3 LED** has appointed **Joseph Tucker** executive vice president and chief financial officer. He joins D3 LED's executive team, which includes founders **Jason Barak**, **Merik Adriansen** and **George Pappas**. The company has also appointed **David M. Tetreault** as senior vice president, marketing and business development.

ABC Sign Products, Ft. Collins, Colo., has remodeled and expanded its wholesale manufacturing facilities. The remodel creates a clean-room environment for processing decorated and push-through faces, and a large room dedicated to CNC equipment processes, according to a press release. ABC has manufacturing facilities in Colorado and Florida, specializing in complex aluminum construction.

CNC Sales of New England, Arlington, Mass., has been selected as the Northeast regional distributor of the Q-Kut Digital Finishing router from **KUTRITE Solutions Inc.**, Charlotte, N.C. "This represents an excellent opportunity for CNC Sales to enter the print marketplace with a proven technology," said **David Paine**, manager of CNC Sales of New England.

TT electronics OPTEK Technology has selected **NRC Electronics** as a global distributor. Headquartered in Boca Raton, Fla., NRC will provide technical support and "on-demand" distribution for OPTEK's optoelectronic sensors and fiber optic devices, visible LED components and assemblies, according to a press release. "NRC's expertise in the component industry, along with sales locations in the Americas, Asia and Europe, positions them well to meet the needs of our optoelectronic and solid-state lighting customers worldwide," said **Alan Bennett**, vice president of sales and marketing for OPTEK Technology.
