

## Bend the Light

A new technology from CeeLite is providing a way to put light on and around all types of flat surfaces. The light emitting capacitor (LEC) technology makes it possible to apply lighting to indoor or outdoor signs, on floors, walls, and even around columns and pillars. The lifetime of the unit is extended by low heat generation and the materials in the product. Panels range in size from 8-by-11 inches to 4-by-8 feet.
